### BASICR3 Wi-Fi Smart Switch

- APP Remote Control
- Timer & Schedule
- Share Control
- Voice Control
- Sync Status
- No Hub Required
- LAN Control

## More Convenient Than APP Control

Internet is unavailable whilst phone is not handy, remote controller is a solid choice

## Talk to Control

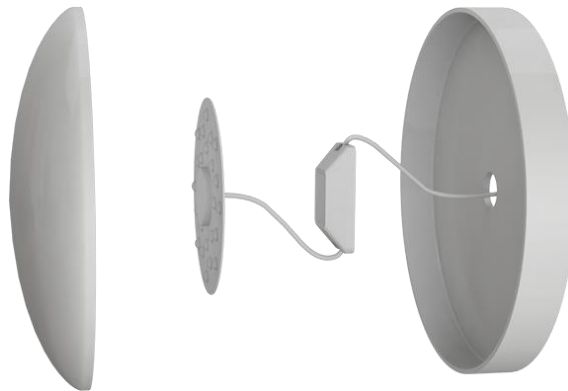

Summon Amazon Alexa or Google Home to switch the device on/off for you, just sit back and wait

## Build More Actions You Expected

Compatible with the IFTTT function, communicate with a slew of devices or send the notification to your phone. Automatically turn your light on at sunset when you're coming home

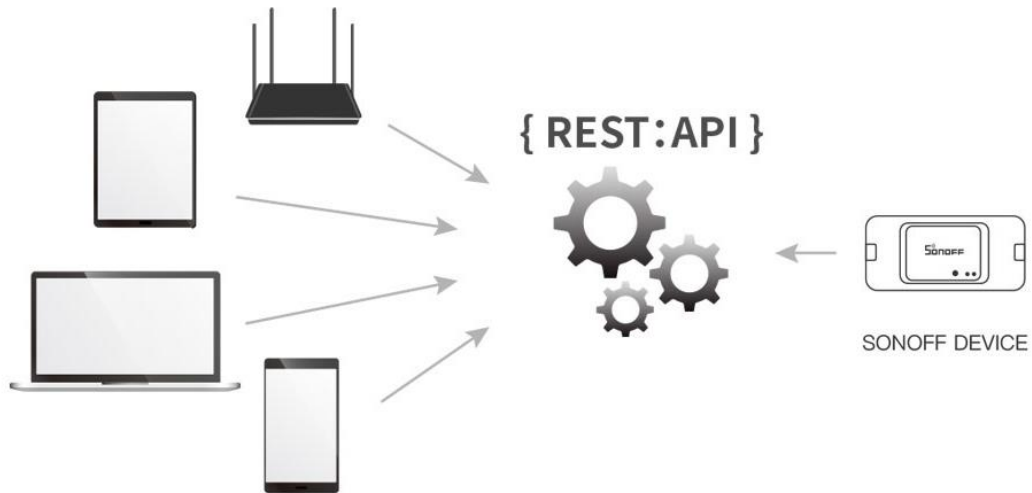

## Universal DIY

Compatible with any household appliances. The small module has DIY capability for users with basic electrician knowledge

## DIY Mode

Utilize the REST API to connect the BASICR3 with your existing home automation system

\*Specially designed for developers
